

Course objectives

By the end of the course, participants will be able to:

- Develop decision making, critical thinking and creative problem solving skills.
- Apply creative approaches to solving problems and making decisions.
- Use creative tools for identifying causes and generating solutions.
- Analyze and solve actual problems facing them at work.

The Approach

The training approach is fun and interactive. The aim is to clarify the fundamental concepts and topics of the program.

The training will be highly interactive and participants will be encouraged to share their ideas, and will be motivated to contribute to the learning process, actively seek answers to their questions and maximize the benefits of training.

Training approach will not follow the typical lecture style. Trainers will focus on using Visual .Hearing .Feeling VHF tools instead of traditional speech style.

Program outline

1. What is the definition of a problem?
2. How to Identify the problem?
